DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 7-18 in Paper No. 8/3/04 is acknowledged.

Claims 1-6 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8/3/04.

Double Patenting

2. Claims 7-18 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of the following of copending applications. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 7-12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Current office policy regarding method claims disclosed as requiring a computer but not claiming the use of a computer is to consider the claimed subject matter as non-statutory for failing to fall within the technological arts. Claims must be tied to a technological art. Tying the method to a computer would overcome this rejection.

5. Claims 7-18 are rejected because they lack patentable utility. Claims 7-18 merely claim the manipulation of data ("logic for" or "code for") but perform no concrete, useful or tangible result. One example of how this rejection may be overcome is by positively claiming the generation of a report or output of data.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 11, 12, 17 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 11 recites the limitation "the stores" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 12 recites the limitation "the stores" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 17 recites the limitation "the stores" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 18 recites the limitation "the stores" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 7, 11, 12, 13, 17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Shavit et al. (US Patent 4,799,156).

Shavit et al discloses the claimed system/computer program product for tracking a performance of suppliers, comprising: Logic for/Code for registering a plurality of suppliers (users are subscribers and thus inherently are registered); Logic for/Code for receiving data utilizing a network, the data relating to the supply of goods to a plurality of distributors by the registered suppliers (such information relating to an order, shipment information, quantity available, etc...); and Logic for/Code for tracking a performance of the registered suppliers utilizing the data (such as the tracking of an order).

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. Claims 8-10 and 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shavit et al. (US Patent 4,799,156) in view of Examiner's Official Notice.

Shavit et al. discloses the claimed system/computer program product but is silent regarding the tracking and comparison of inventory levels of suppliers.

Examiner takes Official Notice that it is old and well known in the art of procurement for purchasers to obtain inventory level information from suppliers and look at supplier's market share in comparison to other suppliers in order to determine availability of inventory and to select a supplier with adequate supply.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the system of Shavit et al. with the supplier inventory levels and comparisons of the Examiner's Official Notice, in order to provide buyers with the ability to determine availability of inventory and to select a supplier with adequate supply.
